### DETAILED ACTION

This action is in response to the amendment mailed December 20, 2001. A new examiner has been assigned.

#### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 23, and 24 are rejected under 35 U.S.C. 102(b) as being anticipated by Grunke et al (US 5,006,419). Grunke et al teach a structural component made of a titanium alloy and covered by a protective coating. The protective coating comprises silicates and also includes high temperature resistant pigments such as chromium oxide. A specific example of the silicate that may be used is sodium silicate (water glass). The protective coating may be applied by spraying (col. 3, lines 59-66; col. 6, lines 58-67; col. 8, lines 26-29).

#### *Claim Rejections - 35 USC § 103*

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Application/Control Number: 09/404,295

Art Unit 1775

Page 3

Claims 2, 4, 5, and 7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Grunke et al (US 5,006,419) in view of Shalaby (US 5,118,581). Grunke et al teach a titanium alloy coated with a layer of silicate and chromium oxide as discussed above but does not give specific examples of the titanium alloys which may be protected. Shalaby teaches protection of gamma titanium aluminides with aluminosilicate coatings. The aluminosilicate coating is applied to the titanium alloy substrate and heated which forms a silicide intermediate layer. As it is shown by Shalaby that silicate coatings may be used to protect titanium aluminide alloy substrates, it would have been obvious to one of ordinary skill in the art at the time of the invention to apply the silicate coating of Grunke et al to the substrate of Shalaby to provide a protective coating which avoids discharge of dangerous compounds (Grunke et al, col. 3, lines 59-66). Regarding claim 2, the application of the silicate layer to the titanium alloy substrate and the subsequent heat treatment would form a silicide layer therebetween.

#### *Allowable Subject Matter*

Claims 17-22 are allowed.

#### *Response to Arguments*

Applicant's arguments with respect to claims 1, 2, 4, 5, 7, 23, and 24 have been considered but are moot in view of the new ground(s) of rejection.

**REQUEST FOR REMAILING OF OFFICE ACTION**

The Assistant Commissioner of Patents  
Washington, DC 20231

Dear Sir:

Faxed herewith, please find (1) a new power of attorney; and (2) a copy of the Office action of 1/14/2002 as received by applicant.

In the course of preparing a response to this Office action, it was just discovered that the wrong Office action was attached to the cover sheet. Specifically, attached to this cover sheet for S/N 09/918,246 was an "Office Action Summary" and "Detailed Action" for S/N 09/404,295 for applicant Bettridge, from Examiner Jennifer McNeil in art unit 1724.

Further muddying the water, is that prior patent counsel filed a "Notice to Examiner of Incorrect Mailing" on 2/6/2002 to bring the above to the attention of the PTO. However, as of yet, applicant has not received a corrected remailed Office action.

Very respectfully, applicant requests remailing of the correct "Office Action Summary" and "Detailed Action" (along with any cited references). Per MPEP 710.06, "Where for any reason it becomes necessary to re-mail any action ( MPEP § 707.13), the action should be correspondingly redated, as it is the remailing date that establishes the beginning of the period for reply. Ex parte Gourtoff, 1924 C.D. 153, 329 O.G. 536 (Comm'r Pat. 1924).

As the statutory period for responding to this Office action runs in a few days (July 8, 2002), applicant's attorney very respectfully requests a phone call (713/667-1200) regarding the status of this requested remailing.

If it would be of assistance in resolving any issues in this application, the Examiner is kindly invited to contact applicants' attorney Mark Gilbreth at 713/227-1200.

Respectfully submitted,

Date: July 8, 2002
